*Case 2003-00433*

Members of the Public Service Commission

The majority of the people who will be impacted by the proposed increase in rates by the Louisville Gas and Electric Company live in the Louisville Metro area. The rising cost of utilities is of great concern to my constituents and because the impact will be most severely felt by people who are least able to attend hearings in Frankfort, senior citizens and working families, I request that you hold at least one hearing on this increase in Louisville.

It is important that people who exist on a tight budget and sometimes have choose between providing food for their families and keeping the electric on have an opportunity to be heard on this critical issue. Please give them an opportunity to be heard.
